## Ocean Session - Summary

*Making a list of instruments
Surface \& Sub-surface sensors sampling interval/frequency were confirmed
But, a list for mooring/float will be added later.

* Minimum requirement for uniform observational data

Ocean mixing experiment requires a more frequent sampling Need to confirm the details of biogeochemical sampling

SK and Mirai will sample water at 6 hourly interval RR will collect water sample once per day (at noon)

* Data Management/Open Policy

All participants agree with CINDY data policy Data exchange among participants will be done through PIs upon request

## Ocean Session - Summary

*Ship Rotation Plan
Ocean group requests Roger Revel cruise Plan-2
SK will find a way to fill the gap during the port call of RR
(SK occupies $0,80 E$ and $0,77 / 83 E$ )
Mirai will call at Colombo during Oct 23-24 (Break is 21-26)

* Recovery plan of moorings and sea gliders

Sea gliders will be recovered by either of RR, SK, and MD (we will decide after all ship time allocation and Sea glider funding were confirmed in January. Back up plan is also needed.) DYNAMO moorings will be recovered by RR

* Intercomparison

Sea gliders vs CTD
Ship vs ship (for CTD, flux, etc.) at least 1 day ?
