

Final results have been uploaded as below. (Indicated in red: deletions, indicated in blue: additions.)

[Updated information]

(1) 2. Summary of results

At Site C0025, core samples of ~~12355.6~~ meters in total length were recovered from 400 to ~~580.5476~~ mbsf ~~(as of March 28, 2019\*)~~.

(2) 2. Summary of results

~~\*Final results will be uploaded to the JAMSTEC website after completion of the Expedition.~~

(3) Table 1

Site C0025 (Proposed site name: KB-01C)					
Hole	Water depth (below sea level)	Drilling depth (below seafloor)	Core sampling depth (below seafloor)	LWD depth (below seafloor)	Summary of results
A	2011 m	<del>580.5</del> 476m	400 m - <del>580.5</del> 476m		Collected <del>198</del> core samples of <del>12355.6</del> meters in total length.

**Table 1. Drilling Results** ~~(as of March 28, 2019 for Site C0025\*)~~

~~(4)-\*Final results will be uploaded to the JAMSTEC website after completion of the Expedition.~~
