

CINDY/DYNAMO/AMIE/LASP special publication collections

These are two online special collections. All papers in the special collections will be printed in their respective journals as normal articles but they will appear online together under the special collection titles as well as under their respective journal issues. For each paper to be included in the special collection, journal editors must be informed so with the special collection titles and/or the key words.

AMS special collection:

The title of the AMS special collection is "Processes, Dynamics, and Prediction of MJO Initiation", with the key word DYNAMO/CINDY/AMIE/LASP. Papers submitted to any AMS journal can be included in the special collection as long as the journal editor is informed so. AMS is accepting manuscripts for this special collection anytime from now.

AGU special collection:

The title of the AGU special collection is "The 2011-12 Indian Ocean Field Campaign: Atmospheric and Oceanic Processes and MJO Initiation". The key words are CINDY-DYNAMO. Papers to be included in this special collection must be submitted to the following AGU journals: JGR-Atmosphere, JGR-Ocean, and JAMES. AGU starts to accept submissions for this special collection from February 15. A second special collection will start a year after that. Any submission before February 15 can still be included in the special collection as long as the journal editor is informed so at the point of the acceptance of the manuscript.
